As of the 5th September online monitoring will become a mandatory legislative requirement as part of new updates to Keeping Children Safe in Education (KCSiE) guidelines.

An increased emphasis on online safety in the guidelines means that by law your school now needs to have an appropriate and effective monitoring system in place.

The use of technology is now a significant component of many safeguarding issues including: radicalisation, child exploitation and sexual predation. The guidance calls for all schools to employ effective online safeguarding mechanisms in order to empower children and safeguard them against online danger.

Compliance will now be inspected as part of Ofsted’s Common Inspection Framework.

Are you confident that your school’s monitoring system is capable of helping you to fulfill your statutory requirement and keep children safe online? If not, or if your current method of monitoring is too time consuming, then please contact us on:

Get Prepared - Our Solution

We can help your school to get ready to fulfill KCSiE’s statutory mandate and ensure that the students in your care are safeguarded while they are using your ICT.

**EASY-TO-USE**
Future Digital’s solutions are specifically designed to be easy-to-use and intuitive, ensuring that no specialist skills are required for use and that the software can be used by your entire staff.

**AUTO PRE-GRADING**
Our groundbreaking Auto Pre-Grading feature automatically assigns a level of risk to each instance of captured activity radically reducing the amount of time spent on assessing activity & ensuring that instances of risk are easily identified.

**ADVANCED REPORTING**
Automatic reporting, alerts and a highly-visual user interface ensure that staff can instantaneously identify potential incidents of risk allowing early intervention and escalation where necessary.

**COST VS RISK**
Future Digital’s active monitoring solutions are fully scalable meaning that no matter how large or small your establishment we can provide you with the most cost-effective solution ensuring that the cost of this solution is directly proportionate with potential risk at your particular school.
